

PURPOSE

Economic indicators allow economists, public policy makers, financial professionals, investors and others to check the state of the economy. Just as temperature, pulse and heart rate provide indications of a person's health, economic indicators serve as "vital signs" for the state of the economy.* In this document, you will find key pieces of data that will give you a clear view of the city of Danville's economic condition.

OUTLOOK

The city of Danville continues to show signs of growth and recovery from the previous economic downturn. With the exception of the median sales price of housing, the key indicators are continuing to show positive changes. The unemployment rate is showing two straight months of decline and business activities continue to increase. A recent article featured in the local newspaper stated that Danville's job growth was the fourth highest in Virginia. While there is still room for improvement among all of the indicators, the data below is evidence of an economy that is primed for growth.

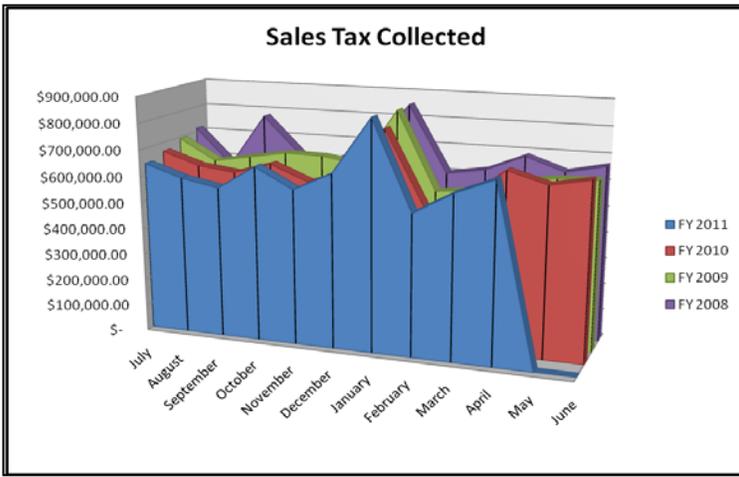

2011 Data: As of 6/2/2011 (Click on chart for monthly breakdown)
